

Marwan Al Hooti

Passport: MW4313719 | **Date of birth:** 26 Jan 2007 | **Place of birth:** Boushar, Oman |

Nationality: Omani | **Gender:** Male | **Phone number:** (+968) 98839367 (Mobile) |

Email address: marwanalhooti26@gmail.com | **Instagram:** marwanalhootii |

Address: House 1056, Way 5923, Jal, 111, Boushar, Oman (Home)

ABOUT ME

I am a motivated and detail-oriented student with a strong interest in Computer Science and Engineering. I enjoy problem-solving and logical thinking, and I am particularly interested in how software and algorithms can be used to create efficient and meaningful solutions. Through my studies, I have developed a solid foundation in mathematics and programming, as well as the ability to work systematically and learn independently. I am eager to further develop my technical skills and contribute to challenging projects at university level.

EDUCATION AND TRAINING

28 AUG 2025 – CURRENT Victoria, Canada

CANADIAN HIGH SCHOOL (DOGWOOD DIPLOMA) St Michaels University School

- AP Calculus BC 12: advanced calculus, including limits, derivatives, integrals, and their applications to analytical problem-solving
- AP Computer Science A 12: programming fundamentals using object-oriented principles, algorithmic thinking, and basic data structures, computational thinking, logical reasoning, and structured problem decomposition applied to software development
- English First Peoples 12: academic writing, comprehension, and clear technical communication
- Digital Art 12: creative problem-solving and basic digital design skills
- Fitness & Conditioning 11: discipline, goal setting, and consistency developed through structured physical training
- independent learning, time management, and disciplined study habits developed through advanced coursework

Website <https://www.smus.ca> | **Number of credits** 80

1 SEP 2010 – 21 MAY 2025 Seeb, Oman

INTERNATIONAL BACCALAUREATE The Sultan's School

- Mathematics: Analysis and Approaches HL (Grade 5) – advanced calculus, mathematical modelling, and analytical problem-solving
- Computer Science HL (Grade 5) – programming, algorithm design, data representation, and computational thinking
- English A: Language and Literature SL (Grade 5) – academic writing, critical analysis, and clear written and verbal communication
- Arabic B HL (Grade 6) – advanced language proficiency and communication skills
- Business Management SL (Grade 5) – organisational planning, decision-making, and understanding business strategy and operations
- Chemistry SL (Grade 5) – scientific reasoning, data analysis, and experimental understanding
- World Studies Extended Essay (Science, Technology and Society) (Grade C) – interdisciplinary analysis of technological and societal challenges, independent research, structured academic writing, and project management
- Theory of Knowledge (Grade B) – critical thinking, reasoning, and evaluation of knowledge across disciplines

HONOURS AND AWARDS

13 MAY 2025

Oman Scholars Programme – Takatuf

Selected as one of 45 scholars out of more than 5,000 applicants for a highly competitive national scholarship programme providing full funding for boarding school and university tuition. The selection process included multiple assessments and a summer residential programme simulating boarding-school conditions.

During the programme, I led a group project, developing leadership, collaboration, and problem-solving skills. In the independent learning phase, I completed a self-directed research project proposing a software-based solution to improve mental health accessibility in Oman, designing a concept application that connects patients with specialised doctors while ensuring anonymity, privacy, and secure text and video communication.

● PROJECTS

20 JAN 2025 – 8 APR 2025

Movie Search Engine

I developed a movie search engine using Python and an open API to retrieve and display movie data dynamically. Implemented keyword-based search and filtering, as well as a user interaction feature allowing users to like content. Processed and structured API data efficiently, strengthening skills in Python programming, API integration, data handling, and algorithmic problem-solving, while translating user requirements into a functional software application.
